

Application

Butterfly valves for increased industrial requirements in process engineering and in industrial applications

Suitable for liquids, vapors and gases

Nominal size DN 100 to 400 · NPS 4 to 16

Nominal pressure PN 10 to 40 · ISO PN 20 and 50

Class 150 and 300

Medium temperature -10 to +400 °C · 14 to 752 °F

Type 3331 Butterfly Valve with

- Type 31a Pneumatic Piston Rotary Actuator (see Data Sheet ▶ T 9929 EN)

Alternatively, as special version with

- Type 3278 Pneumatic Rotary Actuator (see Data Sheet ▶ T 8321 EN)

Body made of

- Cast steel
- Cast stainless steel

Butterfly disk

- Swing-through design
- Angle-seated (low-noise)

Special features

- Butterfly valve can be clamped between DIN or ANSI flanges
- Wafer-type body in various versions depending on the nominal size and pressure (see Fig. 3 and Table 9)

Attachment of control valve accessories such as pneumatic or electropneumatic positioners, electric or pneumatic limit switches or solenoid valves according to VDI/VDE 3845.

Versions

Standard version

Type 3331 Butterfly Valve with swing-through or angle-seated (low-noise) disk for medium temperatures from -10 to +220 °C (14 to 428 °F), spring-loaded PTFE packing

- **Type 3331/31a** (Fig. 1) · Butterfly valve and single-acting Type SRP Pneumatic Rotary Piston Actuator

Special version

- **Type 3331/3278** (Fig. 2) · Butterfly valve and single-acting Type 3278 Pneumatic Rotary Diaphragm Actuator

Further versions

- **Graphite packing** · Suitable for medium temperature from -10 to +400 °C (14 to 752 °F)
- **DN 50 and 80 with angle-seated disk** · Without noise reduction, made of bar stock (steel) or cast stainless steel

Fig. 1: Type 3331/31a Pneumatic Control Butterfly Valve

Fig. 2: Type 3331/3278 Pneumatic Control Butterfly Valve

- **Double packing**
- **Form-fit flanges** · On request
- **Handwheel**
- **Extension for low temperatures**
- **Hand-operated or electric actuator** · On request
- **Double-acting rotary actuator** · On request
- **Step-seated butterfly disk** · On request

Note on various versions available

The butterfly valve is available in the following versions (see Fig. 3 and Table 9):

- Fig. 3a: DN 100/NPS 4 as wafer-type body without centering lugs or drilled holes
- Fig. 3b: DN 150 to 400/NPS 6 to 16 as wafer-type body with centering lugs without threads to aid installation into the pipe-line
- Fig. 3c: DN 300 and 400/NPS 12 and 16 (depending on nominal pressure) as wafer-type body with threaded lugs or drilled holes

Fig. 3a: DN 100/NPS 4

Fig. 3b: DN 150 to 400/
NPS 6 to 16

Fig. 3c: DN 300 and 400/
NPS 12 and 16

Fig. 3: Various versions of the wafer-type body

- 1 Centering lug without thread
- 2 Threaded lug or drilled hole

Principle of operation

The medium flows through the butterfly valve. The flow coefficient depends on the opening angle of the butterfly disk.

In Type 3331/31a, the actuator motion is transmitted using a square drive. In Type 3331/3278, a single key drive is used to transmit the motion from the actuator to the shaft.

The shaft is sealed by a packing.

Fail-safe position

Depending on how the actuator (see Data Sheets ► T 9929 EN and ► T 8321 EN) is mounted on the valve, the valve has two different fail-safe positions:

Fail-close valve

The valve is closed upon air supply failure.

Fail-open valve

The valve is opened upon air supply failure.

Table 1: Technical data for Type 3331 Butterfly Valve

Nominal size	DN 100 to 150 · NPS 4 to 6	DN 200 to 400 · NPS 8 to 16
Nominal pressure	PN 10 to 40 (DIN) · PN 20 and 50 (ISO) · Class 150 and 300 (ANSI)	
Temperature range		
Standard version	−10 to +220 °C · 14 to 428 °F	
With graphite packing and insulating section ¹⁾	−10 to +400 °C · 14 to 752 °F	
Opening angle		
On/off service	90° · 70° with angle-seated (noise-reduced) butterfly disk	
Throttling service	70°	
Leakage rate, in relation to K _V coefficient at the opening angle		
Swing-through design	≤ 1 % (K _V 90°)	≤ 0.5 % (K _V 90°)
Angle-seated (low-noise)	≤ 1 % (K _V 70°)	≤ 0.5 % (K _V 70°)
Rangeability with φ ₁₀₀ = 70°	50:1	

¹⁾ Taking into account material-specific temperature limits down to -50 °C (-58 °F) · See Information Sheet ► T 8000-2 EN

Right: Angle-seated (noise-reduced) butterfly disk

Fig. 6: Disk versions for DN 100

Notes on the differential pressure tables

The specified K_V coefficients apply to a nominal opening angle of $\varphi_{100} = 70^\circ$.

The following also applies:

Δp_0 : Permissible differential pressure with closed butterfly valve

Δp_{100} : Permissible differential pressure at nominal opening angle φ_{100} (open position 70°)

The permissible differential pressures are restricted by the nominal pressure (see Information Sheet ► T 8000-2 EN).

Only butterfly valves for on/off service can be used without a positioner. A positioner is required in all other cases.

Table 6: Permissible differential pressures · All pressures stated in bar

Table 6.1: Type SRP Actuator (fail-open or fail-close)

Values in parentheses for supply pressure only apply to body of 1.0619 and shaft of 1.4021.

Use a graphite/carbon packing for temperatures above 220°C .

		2060 ⁵⁾	1500 ⁵⁾	1260 ⁵⁾							

¹⁾ Only with swing-through butterfly disk

²⁾ Values apply to PTFE packing. Add the following values when a graphite packing is used: 8 Nm for a 16 mm shaft diameter; 15 Nm for a 25 mm shaft diameter; 30 Nm for a 36 mm shaft diameter

³⁾ Permissible differential pressure [bar] with closed butterfly valve

⁴⁾ Permissible differential pressure [bar] with open butterfly valve (70°)

⁵⁾ Applies to shaft material 1.4021 with body of 1.0619

¹⁾ Version without threaded holes

Dimensional drawings

Fig. 7: Dimensions of Type 3331 Butterfly Valve (example in DN 100/NPS 4) with actuator

Note: The number of flange bores varies depending on the nominal size and nominal pressure.

Ordering text

Nominal size	DN .../NPS ...
Nominal pressure	PN .../Class ...
Butterfly valve	Swing-through or angle-seated (noise-reduced) butterfly disk
Body material	According to Table 2
Fail-safe position	Fail-close or fail-open
Process medium and its density in kg/m ³	
Max. flow rate	kg/h or m ³ /h in standard or operating state
Supply pressure available	
Δp_0 and Δp_{100}	
Medium temperature	
Valve accessories
